Sacred geometry ascribes symbolic and sacred meanings to certain geometric shapes and certain geometric proportions. It is associated with the belief that a god is the geometer of the world. The geometry used in the design and construction of religious structures such as churches, temples, mosques, religious monuments, altars, and tabernacles has sometimes been considered sacred. The concept applies also to sacred spaces such as temenoi, sacred groves, village greens, pagodas and holy wells, and

Solids, i.e. three-dimensional shapes, also have a place in sacred geometry. The most commonly-mentioned solids in sacred geometry are the so-called Platonic solids. Although Plato did not create these solids himself, they are named after him, as he mentions the term in his dialogue Timaeus. In this work, the Greek philosopher discusses five different types of solids, which are the tetrahedron, hexahedron (or cube), octahedron, dodecahedron, and icosahedron, which have four, six, eight ...
